

## **CLAIMS**

---

### **WHAT IS CLAIMED IS:**

1. A cap comprising:
  - 2 a body having a front portion, a back portion, side portions, and a lower peripheral edge, wherein the back portion includes an inverted U-shaped opening;
  - 4 a sweatband coupled to the lower peripheral edge, wherein the sweatband includes an elastomeric section;
  - 6 a visor obliquely coupled to a substantial portion of the lower peripheral edge;
  - and
  - 8 a first ribbon and a second ribbon coupled to opposite ends of the inverted U-shaped opening.
2. The cap of claim 1 wherein the body comprises a plurality of gores.
3. The cap of claim 2 wherein the body comprises six gores.
4. The cap of claim 1 wherein the elastomeric section of the sweatband spans the
  - 2 inverted U-shaped opening.
5. The cap of claim 2 wherein the visor, the first ribbon, and the second ribbon
  - 2 have a same color.

6. The cap of claim 1 wherein the body is formed from unilaterally stretchable  
2 fabric.

7. The cap of claim 1 wherein the body is formed from multi-axially stretchable  
2 fabric.

8. A cap comprising:  
2 a plurality of gores defining a body having a lower peripheral edge, wherein the  
body includes a passageway sized to hold a ponytail;  
4 a sweatband having an elastomeric section, wherein the elastomeric section of  
the sweatband spans the passageway;  
6 a first ribbon and a second ribbon coupled to the body adjacent to the  
passageway; and  
8 a visor obliquely coupled to the body, wherein the visor is generally oval-  
shaped.

9. The cap of claim 8 wherein six gores define the body.

10. The cap of claim 8 wherein wherein the visor, the first ribbon, and the second  
2 ribbon have a same color.

11. The cap of claim 8 wherein the body is formed from unilaterally stretchable  
2 fabric.

12. The cap of claim 8 wherein the body is formed from multi-axially stretchable  
2 fabric.

13. A cap comprising:  
2 six gores defining a body having a lower peripheral edge;  
an inverted U-shaped opening positioned along the lower peripheral edge of the  
4 body;  
a sweatband having an elastomeric section, wherein the elastomeric section of  
6 the sweatband spans the inverted U-shaped opening;  
a first ribbon and a second ribbon coupled to opposite ends of the inverted U-  
8 shaped opening; and  
a visor has a generally circular outer radius and a U-shaped recess, wherein U-  
10 shaped recess is obliquely coupled to the lower peripheral edge of the body.

14. The cap of claim 13 wherein the visor, the first ribbon, and the second ribbon  
2 have a same color.

15. The cap of claim 14 wherein the body is formed from unilaterally stretchable  
2 fabric.

16. The cap of claim 13 wherein the body is formed from multi-axially stretchable  
2 fabric.
